CLAIM SUGAR SOLD TO U. S. NOT PRIVATELY

BUCENOS AIRES, June 24.—The statement by Howard Pigg, special agent, to the attorney-general at Washington, that the United States government is not connected with the purchase of 14,000 tons of Argentine sugar beyond leading its influence to obtain the removal of export restrictions, was read with surprise in government circles. When President Irogon granted the American ambassador, Mr. Stimson, permission to export sugar without certain restrictions which are imposed on private exporters, an announcement to this effect appeared in the government organ, La Esencia, with the explanation that the sugar was for the United States government. The Associated Press is informed by the highest authority that this explanation was correct and that the sugar was bought through an American trading company here directly for the account of the United States department of justice, and it was only the ground that it was a United States government transaction that President Irogon removed the restrictions.
